

## IN-DIE TAPPING

### OFF-THE-SHELF IN-DIE SOLUTIONS

AUTOMOTIVE IS RESTARTING - More and more companies are reviewing their supply chains and asking “Should my supplier be based in America?”. Jarvis’ manufacturing headquarters is proudly located in New Hampshire and our satellite engineering locations are strategically placed throughout the US, Canada and Mexico. If you’re located in North America - we’ve got you covered.

We invite purchasing managers to schedule a time with Costikyan to discuss how we have provided cost effective solutions for taps used on a regular basis as well as on taps only used occasionally.

We invite production teams to schedule a meeting to discuss how we have increased tool life on basic materials applications all the way to AHSS metals.

### HAVE QUESTIONS?

### WANT TO LEARN MORE?

We invite you to schedule a 1-on-1 chat with Jarvis Cutting Tools' President [Costikyan Jarvis](#). He is one of the last Presidents who actually grew up in the business and you can put his lifetime of experience to work for you. He is opening up his schedule to connect and answer questions. *Schedule yourself now!*

## TAPPING STAMPED PARTS

"SPECIAL TOOLS ARE COSTLY"

- 1 The Radial Coolant Tap technology has dramatically reduced costs and improved tap performance by applying coolant exactly where you need it – at the forming threads. **RADIAL COOLANT**
- 2 The M7.5 is a customized Jarflo tap designed with a non-standard shank and square with ultra-close overall tolerance dimensions and a short 1.25 thread lead. **M7.5**
- 3 A 50% production gain is expected with the Tap/Reamer as this tool covers two operations in one by reaming and then threading the hole. **TAP REAMER**
- 4 The M4.2 is a customized geometric design tailored specifically with the customer in mind to ensure their competitive advantage and unparalleled cost per hole. **M4.2**
- 5 The M20 features a specially developed PVD coating for both superior tool performance and tool life. **M20**
- 6 Our long-lasting gage member design ensures you re-purchase less frequently and the visual indicator located on the member ensures you know when it's worn. **GAGE**

### APPLICATION SPECIFIC TAPS

#### A COMPETITIVE ADVANTAGE

Move beyond standard taps to tools that meet your exact requirements. Want a controlled minor diameter? Done. Half H-Limit? Done. Through the spindle coolant? Done. Special pitch or diameter? Done. We do it all.

## MACHINE SPECIFIC TAPS

### MACHINE BUILDER PARTNERSHIPS

#### WE KNOW YOUR EQUIPMENT

What you do is a process - all the pieces need to work together. Here at Jarvis we work hard to understand the entire process and a critical part of that is working with the machine builders. Leading brands choose Jarvis taps.

### FURTHER CONSIDERATIONS WHEN CHOOSING A NEW SUPPLIER:

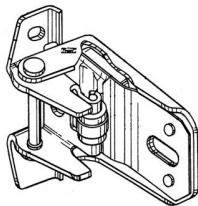

- **Risk Reduction**
  - Having a Made in America supplier in your supply chain is more critical than ever before. To all who are concerned about imports and we are reaching out to you now- let's have a conversation about your tap needs and see if Jarvis might be a 'good supplier fit' for you to add to your mix.
- **Responsiveness/Availability**
  - For many in-die applications we have off-the-shelf options for you. If what you need right now is quality tools without carrying bulk inventory, long lead times or lengthy

contractual commitments- check out our current [inventory](#).

- **Reduced Anxiety/Access**
  - We are a family owned company who provides an assigned engineer and account manager to all customer accounts. We operate on EST and 'real humans' answer our phones and e-mails. As a customer of ours you can talk directly with the factory, the president, and ownership if you wish.
- **Reputational Assurance**
  - Since it's birth in 1901, Jarvis Cutting Tools has been a catalyst for quality and inspired innovation in the cutting tool industry. We are committed to living up to our reputation of: high performance products, on-time deliveries, and cost effective solutions. The five generations of Jarvis ownership have remained competitive in a global market based on these brand commitments.

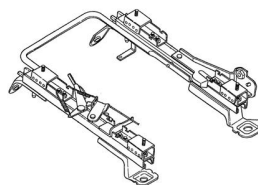

## WHAT'S IN COMMON WITH THESE IN-DIE APPLICATIONS?

They all have threaded holes where Jarvis supplies the taps! Jarvis provides industry leading cost-per-holes solutions for a wide variety of industrial customers.

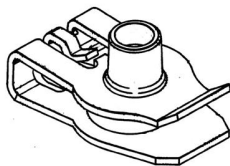

DOOR HINGE

## AUTOMOTIVE

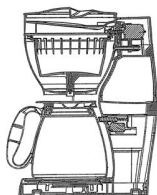

SEAT ADJUSTER

U-NUT

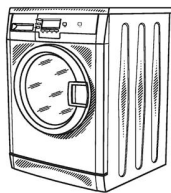

## ELECTRICAL

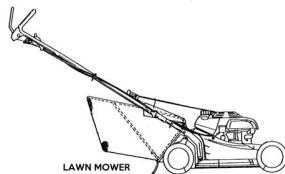

COFFEE MAKER

## APPLIANCES
