LET US INTRODUCE OURSELVES

we are

JARVIS

CUTTING TOOLS

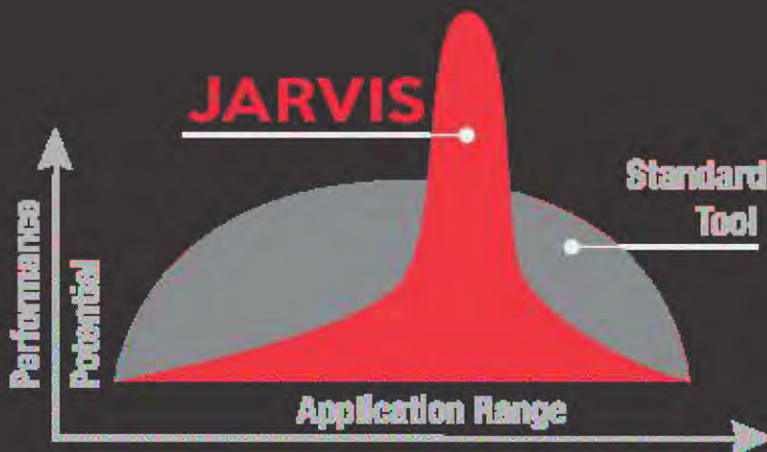

Since 1901, Jarvis Cutting Tools has been a catalyst for quality and inspired innovation in the Cutting Tool industry while remaining a family owned company. Throughout the generations our mission has always been the same; to deliver you the best possible tool for your application and to provide you with exceptional customer service every step of the way.

Jarvis tools consistently outlast and outperform the competition and the true measure of a tool's value, is its in-factory performance, but, we understand that price is important. We offer competitive pricing and distributor discounts to fit our customer's budgets. Where we truly excel is on supplying customers with application specific tooling solutions (i.e. specials). If you don't see what you need here, please contact our engineering team through our website.

We take a lot of pride in the work that we do and our products are proudly made in the USA. Thank you for supporting American manufacturing by buying American made products.

OUR TAPS SIGNIFICANTLY RAISE THE BAR FOR OUR CLIENTS

JARVIS DELIVERS POSITIVE OUTCOMES TO YOUR PRODUCTIVITY AND BOTTOM LINE.

TEST 1

Jarvis Taps	Existing Taps
6,635	3,200

TEST 2

Jarvis Taps	Existing Taps
22,495	16,000

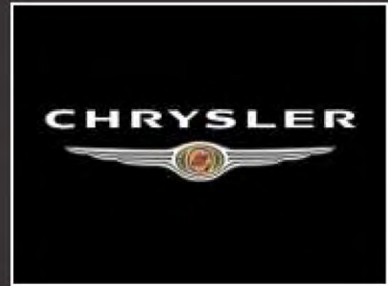

IF YOU DON'T TRUST US – TEST US

High quality tools is our think - Through an extensive quality program, in-house testing, and an extensive training program we diligently defend Jarvis' long-standing reputation. We maintain a 99.4% order acceptance rate and 95% on time deliveries.

THE
GOLD STANDARD
IN TAPS

OUR VALUED CUSTOMERS KNOW FROM EXPERIENCE

PIPE TAPS

Jarvis offers one of the most extensive inventories of pipe taps in the market. Not only do we stock common items, we also offer items like:

- Small Shank
- Extended Length
- Interrupt
- Short Projection
- Whitworth Thread Form
- Form Taps (Jarflos)
- And Many Others

Size	Description	Flute
1/16	NPT, NPTF, NPS, NPSF, AND SHORT PROJECTION	4
1/8	NPT, NPTF, NPS, NPSF, SMALL SHANK, SHORT PROJECTION, AND BSP	4
1/8	INTERRUPT	5

J80 TAPS

Jarvis' High-Performance Tap Line for Cast Iron & Aluminum Castings.

Ideal for Cast Iron, Ductile Iron, Cast Aluminum, Powdered Metal and Ductile Casting Applications. For machines with through the spindle coolant, the coolant-thru option will offer better performance. Combine with synchronized tapping at the recommended tapping speed of 200-300 SFM for Cast Iron and higher in Aluminum.

Coated: Titanium Aluminum Nitride (TiAlN).

FINE PITCH (UNF) SPIRAL POINT TAPS

Take advantage of taps that have been design, tested, and used in Aerospace Applications to boost your productivity.

Achieving optimal performance requires a specific geometry for your material. That is why Jarvis offers three product lines are designed for different material family. Each of the product lines is produced using Ultra-Premium Powdered High Speed Steel to provide excellent wear resistance.

We also include a multi-layer, Aluminum based PVD coating to allow you to run at higher speeds. Each material family has a customized cutting geometry that ensures excellent thread quality and proper chip evacuation.

We provide an extremely free-cutting design for soft materials, a less aggressive design for mid-range materials, and a tough design for the hard to machine materials.

JARHOOKS FOR SOFT MATERIALS

For A286 Soft 31 Rc and under; 300 Series Stainless Steel; Aluminum; Steels Low Carbon; Leaded Steels; Titanium 3AL2.5V; Copper.

We offer competitive discounts for distributors and based on volume. Please contact your sales representative or account manager for discounts. All prices are in US dollars. All listings, pricing, availability and specifications are subject to change at any time without notice. Pricing, photographic and typographical errors are subject to correction at any time. A continuously updated version of this catalog is available on our website at jarviscuttingtools.com

JARFLO TAPS

You will not find any forming taps (Jarflo's) that work as well as ours!

Some of the basic characteristics of the two product lines:

Jarflos (Standard Performance)

- Premium Powdered Steel
- Crest Radius Design (versus Truncated Flat)
- TiN Coating
- Designed for General Purpose Applications

Jarflo Ultra (Premium Performance)

- Premium Powdered Steel
- Crest Radius Design (versus Truncated Flat)
- TiCN Coating
- Geometry optimized for Low Friction
- Designed for Hard to Machine Materials (Stainless Steel, Hardened Steels 32-40 Rc, Inconel)
- Advanced High Steel (AHSS) (Dual-Phase)
- High Strength Low Alloy (HSLA) (XF-550)

STUB JARFLO

These tools are design to operate in the Danly® In-Die Tapping Units and the Amada® Turret Style attachments.

Jarflos (Standard Performance)

- Premium Powdered Steel
- Crest Radius Design (versus Truncated Flat)
- TiN Coating
- Designed for General Purpose Applications

Jarflo Ultra (Premium Performance)

- Premium Powdered Steel
- Crest Radius Design (versus Truncated Flat)
- TiCN Coating
- Geometry optimized for Low Friction
- Designed for Hard to Machine Materials (Stainless Steel)

IN-DIE JARFLO

PERFORMANCE + **ULTRA** PERFORMANCE SERIES

These taps are optimized for In-Die tapping applications. They are designed to work specifically with the Pronic tapping units, but also can be used in the Hutchinson and ATS tapping units.

Jarflos (Standard Performance)

- Premium Powdered Steel
- Crest Radius Design (versus Truncated Flat)
- TiN Coating
- Designed for General Purpose Applications

Jarflo Ultra (Premium Performance)

- Premium Powdered Steel
- Crest Radius Design (versus Truncated Flat)
- TiCN Coating
- Geometry optimized for Low Friction
- Designed for Hard to Machine Materials (Stainless Steel)

NUCON HSS DRILLS

Jarvis' Nucon HSS drills are engineered for drilling gummy materials like Aluminum. They have several advantages on standard HSS drills and carbide drills including:

- Manufactured from premium HSS material
- 118° Helical Point eliminates need for spot drilling
- 118° Helical Point reduces exit burr
- All diameters are 2.64" OAL. Short length improves rigidity and simplifies CNC programming.
- Flute geometry almost eliminates the problem of Aluminum "packing" the flutes
- PVD Coatings available upon request

2.64" Overall Length - 118 Helical Point
Engineered especially for close tolerance drilling

ROTARY FILES AND CARBIDE BURRS

Firstly, Jarvis HSS and carbide rotary files are without question the most durable in production. Consequently, they are popular in aerospace, mold making, tool room and die shop use. Thus, repeated tests have proven Jarvis rotary files outlast competitive files.

Secondly, their versatility of application ranges. Accordingly, from machinable or grind-able materials to plastic or hardened steel. As a result, they have become firmly established among those who appreciate quality.

In conclusion, Jarvis offers a variety of fluting alternatives for your application. Jarvis can hand pick a tool that can get the job done. Your project depends on the material removal rate and finish requirements. Trust Jarvis for all of your needs.

AVAILABLE MATERIALS

Carbide: Offers superior durability and higher speed.

COMBINATION DRILL - TAP

Combination drill - tap tools inherent capability of operating as a two-in-one solution provide cost savings and faster operative results. Jarvis combination drill and tap tool sets are uniquely strong & customizable to fit whatever your application needs are. Recommended for thru hole functions, Jarvis combination drill - tap tools can be set at 65-75% thread depending on what the unique application is.

In general, the drill point must break through (“thru”) the material before the tap portion begins its function for clean, efficient results. Therefore it’s important to verify the drill and thread lengths of the job so that the tool can be manufactured correctly. If you have questions about any of this, we have a team of engineers on staff to make the appropriate measurements and design the best tool for the job.

KEY THINGS TO REMEMBER:

- **Two operations on each tool**
- **Ground with close tolerances**
- **Made to reduce productions costs by up to 50%**
- **Available as stock tools, metric and pipe sizes, as well as blueprint options meeting exact specifications**
- **Drills are designed to tap between 65% and 75% thread**

FURTHER NOTES:

- **For use on thru hole applications only**
- **Drill point must penetrate through part prior to thread initiation**
- **Spindle speed should be set at normal for tapping specific material being machined**
- **As with any tapping operation, a reversing spindle is required**

COMBINATION DRILL-TAP

Jarvis offers combination drill - tap tools with self-centering points, and have them ready/off the shelf. Tap and reamer combinations can also be manufactured and our coveted piloted taps program can be utilized to create tools ground to close tolerances, built to meet your unique application requirements.

DON'T SEE WHAT YOU NEED?

LET'S GET YOU EXACTLY WHAT YOU'RE LOOKING FOR

The simple thing here would be to call us. We're happy to help talk through any unique application you're working on and need a tool for. That said, some tools aren't your "everyday" off-the-shelf kind of solution.

In that spirit, Jarvis makes a variety of special tools to satisfy and exceed customer expectations. When your print requirements cannot be fulfilled by a standard catalog item, Jarvis will design and manufacture what you need to your exact print specifications.

FROM STANDARD TO SPECIAL

Reducing the **cost-per-hole** offers you additional value. Just because it "works" doesn't mean it's "working" on all levels and vantage points.

CONSIDER THE FOLLOWING:

- How frequently do you run this job/tool?
- How many of these taps do you purchase per year?
- How many units do average per tap
- What is the standard deviation?

SPECIAL TOOLS

CUSTOMER SERVICE & SUPPORT

Contact us whenever you need assistance. Our dedicated team is here to help you with pricing, availability, tool selection, application advice, operating guidelines, and technical support.

Call - 1+ (603) 332-9000 Monday through Friday from 7:30AM to 5:00PM EST

Email - info@jarviscuttingtools.com, please allow up to 24-hours for a reply; or email your Jarvis Sales Rep or Account Manager directly.

Web - visit jarviscuttingtools.com for Online Ordering and New Customer Forms

- [Application to Set Up Account](#)
- [Credit Application](#)
- [Order Form](#)

PAYMENT:

We accept the following credit cards: American Express, Visa, MasterCard, and Discover. If you choose to pay with a credit card, please be sure that you have mentioned that to your Account Manager. We will need the credit card number, expiration date and billing address.

SHIPPING:

Orders are shipped Monday through Friday, and in most cases, standard items ship within 24 hours. If you need rush shipping please contact your account manager. We will hold orders for up to 7 business days to allow temporarily out-of-stock items to finish production. If we expect that your order will not ship within 7-10 days we will attempt to contact you. Normal procedure is to ship all distributor orders by UPS, unless requested otherwise.

RETURN POLICY:

Please call customer support or email your account manager. A return authorization is required.

COMPETITIVE PRICING:

Prices are in US dollars. All listings, pricing, availability and specifications are subject to change at any time without notice. Pricing, photographic and typographical errors are subject to correction at any time. We offer competitive discounts for distributors and based on volume. Please contact your sales representative or account manager for discounts.

QUALITY GUARANTEE:

Jarvis products are manufactured and inspected to exacting standards. We stand by our US made tools. Your satisfaction is important to us. If you have any concerns over the quality please do not hesitate to contact us.
